switched on and off again with the short-stroke button.

Two-way valve

By turning the twoway valve, different groups of water jets can be controlled.

DIMENSIONS

OPTIONAL FOR EVERY TUB LED RGB COLOR LIGHT SYSTEM

PURE LUXURY FOR BODY AND SOUL

The LED RGB single spots create a wonderful, relaxed ambiance. They produce gently changing colors and a calm, low-stimulus atmosphere. This unique lighting experience can be controlled and paused using the electronic touch switch.

If you want to bathe your pool in a single color, you can choose from 7 primary colors: red, yellow, green, turquoise, blue, violet, white.

KOLLER MILK

PURE PLEASURE FOR YOUR SKIN

Within 20–30 seconds, the Milk System enriches the water with countless microscopic air bubbles through fine inlet nozzles. The water takes on a milky, cloudy appearance – hence the name.

These delicate bubbles gently envelop the body, deeply oxygenating the skin and stimulating cell renewal. Oxygen is essential for daily skin regeneration – without it, the skin can quickly appear dull and tired.

To achieve the full effect, no other whirlpool functions should be active while the Milk System is running. However, the LED RGB light system can still be used.

The KOLLER Milk System can also be installed without a whirlpool system.
