

KOLLER
AQUA ACTIVE

REVITALISES
Your Water

We do not imitate - we innovate!

At Koller, we have achieved the highest manufacturing standards through three decades of groundbreaking advances and experience. Our ongoing development in hydrodynamic technology and enviable market position has been achieved by the unique ability to develop and produce a complete range of products in-house.

Austria plant

Czech Republic plant

At the parent plant in Vitis (Austria), our Research and Development department is constantly looking to develop new products and improve existing hydro techniques keeping up with the demand of a worldwide leading company. Along with our production plant in the Czech Republic, Koller is represented by several sales offices in Vienna, Malta, Valencia, Prague, Moscow and London and has six big warehouses in Austria, Czech Republic, Spain, Russia, Great Britain and China.

Due to this one-stop business we can guarantee quick delivery of our products.

What is **KOLLER** AQUA ACTIVE

Water that has been revitalised by **KOLLER AQUA ACTIVE** has a multitude of noticeable qualities and effects that would fascinate the users while experiencing them.

Long term research and development for an ecological water treatment and a sustainable alternative to the existing processes, resulted in a specialised way of water resuscitation, for all creatures and natural habitats.

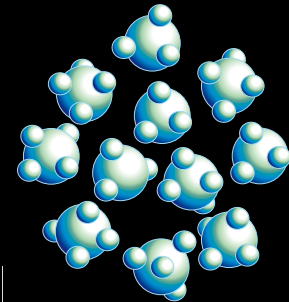

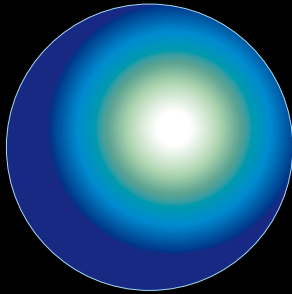

The water that we are using from the water supply is being treated and pumped, compressed under high pressure. Through these encumbrances the water is often denaturised and carries pollutants.

Koller Aqua Active technology enables recovery of water's natural and energised status that it has at the onset of spring water. **KOLLER AQUA ACTIVE** returns the water to its original state and virtue.

EXPERIENCE
REVITALISED
Water

Increasing absorbing capacity/receptivity of information

water

**extreme
turbulence**

decompressed,
revitalised and
pure water

Koller Aqua Active provides an effect similar to what occurs when water flows naturally through stones and gravel, by creating microscopic small whirls. The solubility of the water also changes, due to this altered water cluster structure. The minerals are obtained and the rough lime crystals crumble down into tiny particles. Oxygen, carbon dioxide as well as any other element or information that the water carries in its core, can be absorbed most effectively. (Water is a well known medium for conducting and memory storing.)

The key feature of all devices is the patented multi chamber system with an integrated cascade mechanism which creates the maximum swirl / turbulence to the water flowing through it.

The structure in the centre of this flow mechanism resembles a geometrically shaped funnel which simulates the vortex of a natural spring.

In this cascade mechanism, scientifically proven processes of water transformation are taking place. Renowned naturalists already recognised the foundation for revitalising water through swirly movements.

Active water is living water! Effective microorganism (EM) strengthens your vital energy and well being.

EM-ceramics are based on mixed cultures of valuable effective microorganisms with strong antioxidant powers, which have a healthy and regenerating effect on humans, animals and the natural environment.

Koller Aqua Active may be used in all areas of household, garden and agriculture, for the regeneration of all vital life processes.

For every field of application there is a specially developed **KOLLER AQUA ACTIVE**.

Please call or email us for more information.

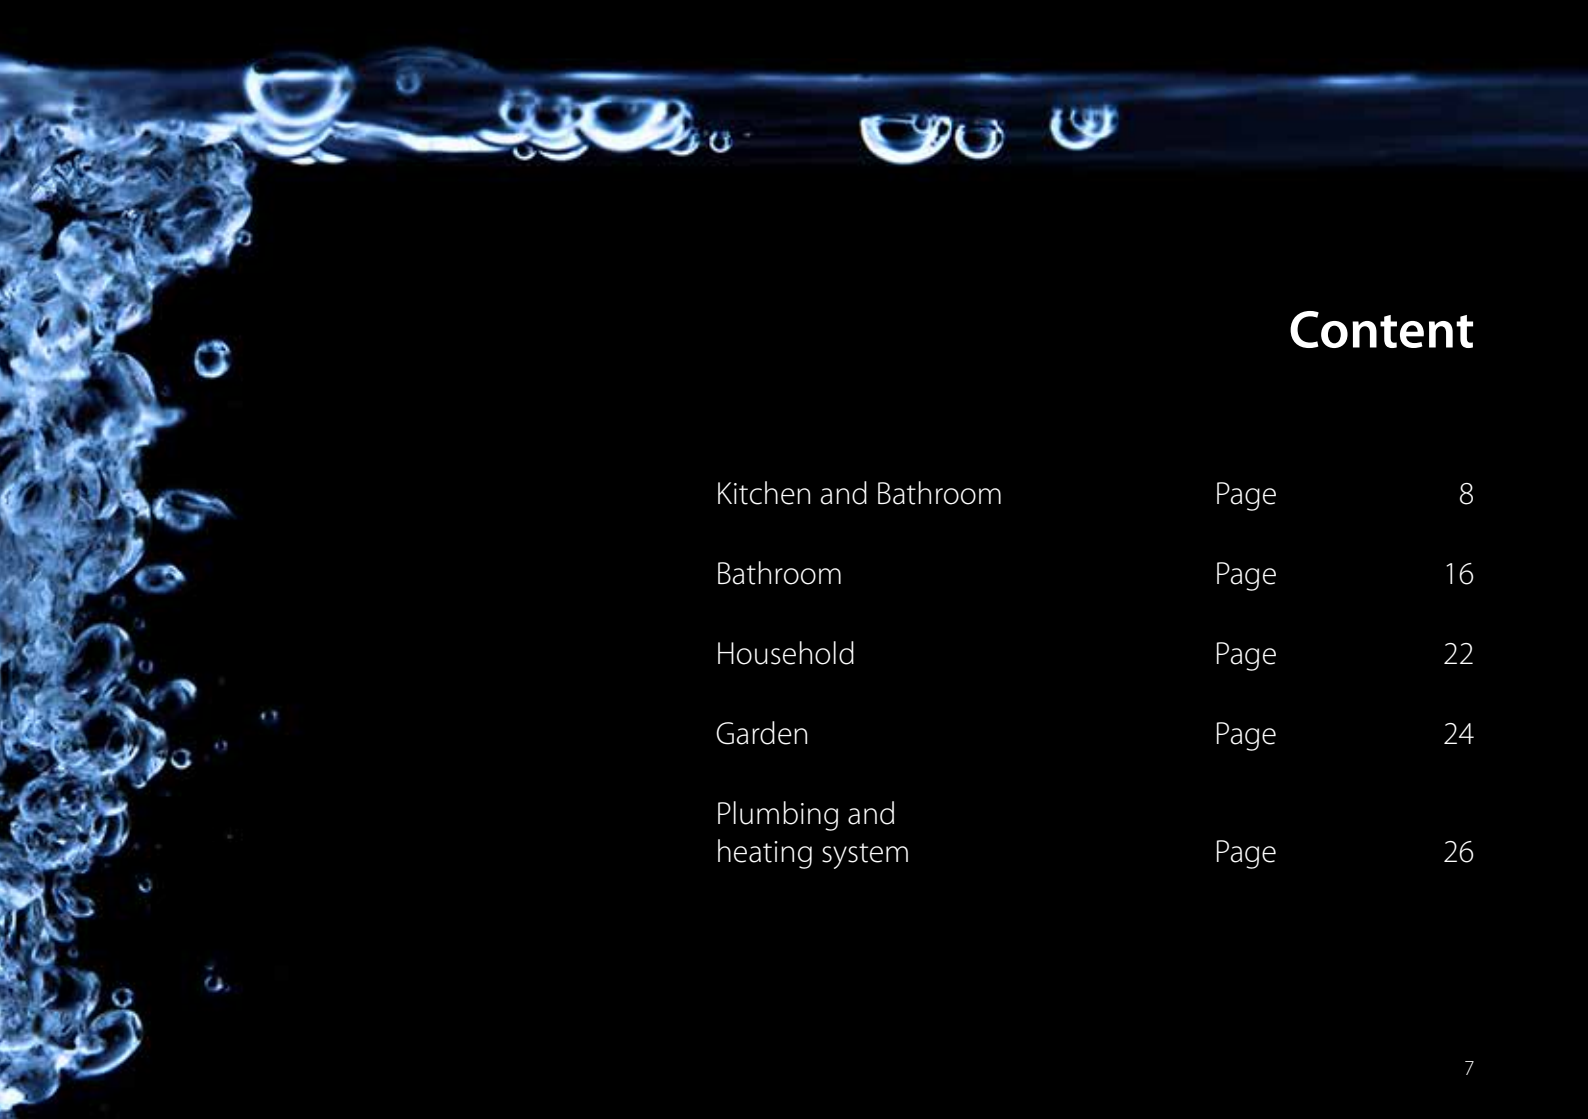

THE BENEFITS of **KOLLER** AQUA ACTIVE

- ✓ vitalises the water
- ✓ reduces lime scale
- ✓ cuts down on regular costs
- ✓ better solubility of the water –
therefore less consumption of shampoo, detergent etc.
- ✓ boosts vitality and well being – also for animals and plants
- ✓ contains valuable effective microorganisms to activate vital functions
