

HOT TUB SPA

HIGH-QUALITY SHELL MADE OF SANITARY ACRYLIC

WHY CHOOSE A HOT TUB FROM KOLLER WHIRL-SYSTEMS?

Our models with integrated stainless steel stove can be used all year round. Our high-quality HOT TUBs have a tub diameter of 180 and 200 cm and are suitable for 4 to 6 people. A HOT TUB from KOLLER is a great alternative – and a trend that can be used all year round.

During summer and winter – pure relaxation – without energy costs.

Whether on the terrace or in the garden under the open sky, the HOT TUB is a real eye-catcher and ensures a wellness experience for young and old. In the basic equipment, no electricity is required, making it sustainable. You can use our HOT TUBs all year round and heat the water temperature as desired with wood – more in winter, less in summer. The integrated powerful stainless steel stove heats the HOT TUB to a comfortable temperature of 37 to 40 degrees Celsius in 2,5 to 3,5 hours (depending on the outside temperature, type of wood for firing, and how strong one heats). It is suitable for chlorine and salt water and is a closed system with optimal efficiency. The stove recess in the HOT TUB can also be used as a seating area or armrest.

HOT TUB Cladding

We offer two cladding variants for our HOT TUB. With the spruce/natural cladding, everyone can freely choose a paint in the desired color. Spruce wood has a tough wood property but requires a bit more care than other types of wood such as Thermowood. The special thing about spruce wood, however, is that you can see a coat of paint better or rather it reproduces it best. As a second variant of the cladding, we offer Thermowood. Thermowood is a heat-treated wood that is characterized by its weather resistance and durability.

High-Quality Ergonomically Shaped Tub Made of Sanitary Acrylic

Our HOT TUBs are made of high-quality sanitary acrylic. Many of our competitors manufacture their HOT TUBs from fiberglass (GRP) - with GRP, there is the possibility of osmosis formation (blistering). Therefore, we have opted for the more expensive high-quality variant.

TECHNICAL DATA

Our HOT TUBs with whirl system feature an integrated stainless steel stove (V4A = stainless steel). All our HOT TUBs are made of high-quality sanitary acrylic.

- Wood type for cladding and accessories:
Spruce/Natural or Thermowood
- Tub color: Dark grey metallic
- Integrated stainless steel stove made of V4A stainless steel with a power of 30 kW, 90° angle for the 2-meter chimney with rain cap and 1-meter heat shield.
- The ball valve for draining the tub is located on the front right next to the oven door and is equipped with a 1" thread.
- Only suitable for firing with dry wood.
Do not use other fuels!
- Paddle for better heat distribution
